

The Delaware Department of Natural Resources and Environmental Control's Whole Basin Management strategy focuses on protecting Delaware's environment by managing it by drainage areas. Using the state's four major drainage basins as the main management units, the Department brings together the expertise from all divisions — Air and Waste Management, Fish and Wildlife, Parks and Recreation, Soil and Water Conservation, Office of the Secretary, and Water Resources — to better assess, monitor, and protect the health of Delaware's environment.

The basis for this integrated approach comes from the realization that virtually every activity that takes place in the environment impacts multiple resources or land-use activities. Thus, managing the complex natural world we call "the environment" requires us to examine the many resources from multiple perspectives.

This report focuses on the Chesapeake Bay Basin, one of Delaware's four major drainage basins. The other three basins that have been assessed through the Department's Whole Basin Management Program include the Piedmont Basin in northern New Castle County, the Delaware Bay and Estuary drainage in eastern New Castle, Kent, and Sussex counties, and the Inland Bays in southeastern Sussex County.

We encourage you to learn more about Delaware's environment and natural resources and share with us your ideas and concerns about the environmental issues in your watershed. We look forward to your input and cooperation as we work to improve and protect the health of Delaware's environment.

If you have any comments that you would like to share regarding this report, please contact DNREC's Public Affairs Office, (302) 739-9902. This publication is available on the Internet. Visit DNREC's web page at www.dnrec.state.de.us.
